प्रज्ञानम् ब्रह्म
Indian Institute of Information Technology, Allahabad

Objective:

To work with an organization, which can provide me constant learning, leading to intellectual growth, enhance my creative skills and to achieve top cadre by setting benchmarks both at organizational and personal front and making positive contributions towards the organization.

Highlights:

- About **7+ years** of experience as a **Machine Learning** / **Python Developer** which involves Application Development in **Django, Machine Learning, Data Science** and **Google Cloud Platform.**
- **Currently** working as, a **AIML Engineer** with **Springer Nature Group, Pune** for developing **Alternative Text Generator for image, Taxonomy Finder, Ethics Check and Budget and Campaign Optimizer** for Marketing Team at multiple location over the globe. Building Artificial Intelligence application using **pre-trained LLM** like GPT4-Vision Preview, Gemini-pro vision and other free LLMs available. Used application like Graphana and Prometheus for monitoring and performance metrics and Building **Google Docs Addon** using Google script and hosted on Google Marketplace.
- **Worked** as, a **Python Developer** with client side of **MPMKVVCL (Madhya Pradesh Madhya kshetra Vidyut Vitran Co. Ltd, Bhopal)** i.e**. State Power Generation Company** outsourced by **MDP INFRA India Pvt ltd, Bhopal** for the Commercial website development called as QCPortal for their **Vendor/ NABL/ TKC/ Solar facilitation, registrations, and LAB equipment (Transformers, Meters, Wire etc.)** onboarding since October 2021. **Theft Detection** Model using Machine learning.
- Worked as **Software Developer** with **CyberInfrastucture Pvt. Ltd, Indore** from March 2021 to October 2021 for building **Machine Learning application** for US client and Python code Israel Military Force.
- Worked as **Python Programmer** with **Aspirify Enterprise Pvt. Ltd, New Delhi** from August 2020 to March 2021 for building Django Web Project with Celery and Redis for network scanning to find vulnerabilities and gather the information using **Machine Learning.**
- **Pursued** internship **as a Data Science Engineer** with **Innoviti Payment Solution PVT LTD**, **Bangalore** from February 2020 to May 2020.
- Worked as **Python Developer** with **SNSE, New Delhi** from July 2017 to August 2019 for building data analytics, web scrapping, python scripts for retrieving and manipulation data, Writing Micro Service API, building data and worked on different projects as per client requirements.
- Worked as **Software Trainee** at **CDAC, Jaipur** from August 2014 to July 2015 for building Java application named "Puzzle Game", Advanced Java application named "Crime File Management System" and Android application named "iDoc".
- During my **M. Tech from IIIT Allahabad**, did many small projects on DNA & Genome Sequencing, Pattern Matching, Olfaction Detection using Machine Learning and Data Science.

Academic Qualifications:

- ⇨ **B.Tech in Computer Science & Information Technology** Engineering from **Poornima College, Jaipur** with **68.86% i**n 2016.
- ⇨ **Master of Technology in Information Technology** from **Indian Institute of Information Technology Allahabad, Uttar Pradesh** with **7.98 CGPA** in 2019.
- ⇨ **Professional Certificate Program in Business Management (PCPBM)** from **Indian Institute of Management, Kozhikode, Kerala** in 2022.

Technical Skills'

- **Operating Systems** : Microsoft Windows / Ubuntu(Linux) / MacOS
- **Languages** : PYTHON / HTML / C/C++ / Java / Android / Google Apps Script
- **Web Development Methods** : Django, Django REST Framework, Google Cloud Platform
- **Front end Technologies** : HTML5 / CSS / JavaScript
- **Version Control Technologies** : GIT / JIRA
- **Agile Development Tools** : JIRA / CONFLUENCE
- **Databases** : PostgreSQL, MySQL, Mongo DB, SQL Server, Oracle
- **Other tools** : Celery, Redis, Docker, Jenkins
- **Testing Framework** : Pytest / Sonar Cube
- **Software Packages** : MS Word, MS Excel, MS PowerPoint
- **Protocols** : TCP/IP, HTTP/HTTPS, SMTP
- **Methodologies** : Agile, Scrum and Waterfall
- **Monitoring** : Graphana and Logging
- **Performance Metrics** : Prometheus

Certifications:

- Certificate of completion for Chatbot Builder Training from Yellow.ai Academy on 20 June 2022.
- Build a Data Science Web App with Streamlit and Python certificate from Coursera on 28 July 2020
- Introduction to Python certificate from Coursera on 20 June 2020
- Python Data Structures certificate from Coursera on 5 May 2020
- Python for Data Science Certificate from Intellipaat on 17 Jan 2020.
- Machine Learning certificate of training from Internshala Trainings with 83 percent marks from 15th Nov to 27th Dec 2019.
- Data Science course completion certificate from LearnVern on 21 June, 2019.
- Advance Java Certification from C-DAC, Jaipur in 2015. Java Certification from C-DAC, Jaipur in 2014.
- Diploma in Hardware and Maintenance from SIIT Computer Education in 2005.
- Diploma in Computer Aided Designing from Heights Computer Education in 2005.

Projects Details:

Organization – Springer Nature Technology and Publishing Solution (Pune)

Python and Machine Learning Application Development : (April 2023 – PRESENT):

Technology : **Python / Django / Machine Learning / NLP / Google Cloud Platform / Fast API / Apps Script / Python Script / Streamlit / JIRA / AGILE**
Duration : 34 months (till now)
Team Size : 12 members

Project 1 Descriptions: The aim is to provide the marketeers with a tool to test different marketing strategies and budget allocation. With the tool a marketeer is able to enter online touchpoints driven by marketing for specific parts of the user journey and in return get an understanding of the potential revenue impact.

Responsibilities : Create UI/UX for the tools using Django python and optimize and fine-tunned the model and plot region wise continental graphs for potential submitters needs.

Project 2 Descriptions: Augmented Insights is an internal toll for editors that allows a human-machine handshake for augmented content creation with large language models.

Responsibilities : Create Google Docs Addon using Apps Script for Augmented Insights.

Project 3 Descriptions: An external DB of EBMs from various journals to enable targeted and tracked communication.

Responsibilities : Data Extraction, Cleaning, Profiling of Jflow free text from XML from the server into CSV files, Merge new and old data, upload the data to SAP server.

Project 4 Descriptions: Explore alternative of LLM Vision model GPT4-Vision for identification of images which will be extracted from PDF and do the cost analysis for all the models.

Responsibilities : Build script to extract PDF from ISBN, extract images from PDF, find alternative of GPT4-Vision and deploy it on the server using FAST API for backend and streamlit for user end.

Project 5 Descriptions: Alternative Text generator for image from Journal and Books.

Responsibilities : Designed and developed an AI-based system to automatically generate alternative (alt) text descriptions for scientific and academic images. Integrated vision-language models to extract meaningful insights from complex figures, charts, and diagrams and deploy it on the server using FAST API for backend and streamlit for user end.

Project 6 Descriptions: Taxonomy Finder (classify and map content into predefined taxonomies)

Responsibilities : Developed an intelligent system to automatically classify and map content into predefined taxonomies using AI and machine learning techniques. The solution analyzes structured and unstructured data to accurately assign categories, subcategories, and hierarchical tags.

Project 7 Descriptions: Evaluate research documents for ethical considerations related to human and animal studies.
Responsibilities : Developed an AI-based compliance system to evaluate research documents for ethical considerations related to human and animal studies. The system analyzes manuscripts, protocols, and reports to verify the presence of required ethical approvals, consent statements, and regulatory compliance.

Organization – Madhya Pradesh Madhya Kshetra Vidyut Vitran Co. Ltd outsourced by MDP INFRA PVT LTD. (Bhopal)

Transformer Onboarding for XMER Repairing and Quality Monitoring Portal for Madhya Pradesh Central Discomm:(: (October 2021 – March 2023)

Technology : **Python/ Machine Learning / Django / Django Rest Framework / GIT / HTML / JS / CSS / Bootstrap**
Duration : 18 months
Team Size : 6 members

Project 1 Descriptions: Transformer onboarding or repairment and tracking the details of vendors, contractors, and testing lab users to properly accommodate the sending and receiving of the transformer as per their xmer code. Document tracing and auto generated mail setup tasks. This app is handling 50000 users.

Responsibilities : Backend product development in Django.

Project 2 Descriptions: "**Quality Monitoring Portal"** is the commercial website for Registration of Vendors, NABL Accredited LABS, Officers of MPCZ distribution company, Turnkey Contractors. Central Purchase system module attached to QCPortal is for the payment management of Vendors.

Responsibilities: Backend Development with Django and PostgreSQL.

Checkout the project at https://qcportal.mpcz.in

Project 3 Descriptions: Electricity Theft Detection for MPCZ Company

Responsibilities: Developed a machine learning-based system to detect electricity theft and abnormal consumption patterns for **MPCZ (Madhya Pradesh Central Zone) Company**. The solution analyzed historical consumption data to identify suspicious behavior, reduce revenue losses, and improve operational efficiency.

Organization – Cyberinfrastructure Private Ltd (Indore)

Python and Machine Learning Development: (March 2021 to October 2021)

Technology : **Python / Machine Learning / Streamlit / Fast API / JIRA**
Duration : 8 months
Team Size : 2 members

Project 1 Descriptions: Develop code modules using python for Israel Military Force outsourced to CIS, Indore.

Responsibilities : Created modular code using python for the client.

Project 2 Descriptions: Need to develop Risk Maturity Assessment System based on questionaries. We have to build a website in which corporate user can login, fill the details provided and do the risk maturity assessment for their organization and generate a report based on the questions asked.

Responsibilities : Created a machine learning model and deployed it using FAST API uvicorn server and used streamlit in the user end, integrated with Django WSGI server for login and logout functionality and storing user details.

Organization – Aspirify Enterprise Pvt Ltd (New Delhi)

Network scanning: (Aug 2020 – March 2021)

Technology : **Python/Machine Learning/ Numpy/ Pandas/ MATPLOTLIB** and **MATLAB**
Duration : 8 months
Team Size : 6 members
Project Type : **Defense and R&D**

Project Descriptions: Build a Django Web Project with Celery and Redis for parallel and fast network scanning to find vulnerabilities and gather the information across the network

Responsibilities : Build a Django python web application for network scanning using freely available libraries on internet and machine learning model for vulnerability detection.

Organization – Innoviti Payment Solution Pvt Ltd (Bangalore)

Network scanning: (February 2020 – May 2020)

Technology : **Python / NumPy / Pandas / MATPLOTLIB**
Duration : 4 months
Team Size : 1(Myself)
Project Type : **Working as Intern as Data Science and Machine Learning Engineer**

Project Descriptions: Analysis the data of various bank's transaction which are intact with Innoviti payment solution

Responsibilities : Liaising with the Development team and help them in the development activities, working on PostgreSQL to interact with company's database, Writing the Queries on the PostgreSQL and Jupyter notebook to fetch the data from DB.

Organization – SNSE (New Delhi)

Python Development: (July 2017 – August 2019)

Technology : **Python / Machine Learning/ NumPy / Pandas / MATPLOTLIB / MySql / AWS / HTML / Bootstrap / ROS / OpenCV / NLP**
Duration : 26 months
Team Size : 3 members

Project 1 Descriptions: Pre-Pair It is a knowledge base aggregation system. Browse through various categories and stay up to date on latest concepts and information through a simple Q & A system. Submit your question/Answer pairs, suggest new categories and topics, suggest new updates and corrections to answers to questions.

Responsibilities : Develop the UI/UX and API

Project 2 Descriptions: This project presents an analysis of the face detection of victims. The focus is mainly on image processing for autonomous robots operating for detecting victims in crisis areas. The purpose of this robot to be applied in a rescue scenario to detect the victim. Its focuses on one of the main objectives of rescue missions is to rescue the disaster victims. Of course, in some situations, it is too risky to send human agents in an unstable environment.

Responsibilities : Developed python code and used OpenCV

Project 3 Descriptions: In this project, we had implemented one collaborative and content-based recommendation system. In it, we had applied collaborative filtering which calculated the correlation between users to generate recommendations. We had also implemented a content-based recommendation where we calculate the correlation between the products to generate the recommendations.

Responsibilities : Developed python code and used data science to get the insights of the data for cleaning and pre-processing.

Project 4 Descriptions: A web application for a leave management system for corporate offices. Employee management system. (Adding, removing, and updating details of employees).

Responsibilities : Developed a Django Application

Project 5 Descriptions: projects as per client requirements.

Responsibilities : Building data analytics, web scrapping, python scripts for retrieving and manipulation data, Writing Micro Service API, building data and worked on different projects as per client requirements.

ACHIEVEMENTS:

- **Certificate of paper to Manuscript entitled "PREDICTING SMELL PERCEPTION FROM MOLECULAR DESCRIPTORS USING MACHINE LEARNING APPROACH" in Institute of Electrical and Electronics Engineers held at 2020 International Conference Engineering and Telecommunication (En&T 2020), Dolgoprudny, Russia 25-26 November 2020 published in IEEE Catalog Number- CFP20X41-POD, ISBN- 978-1-7281-8830-0, page 331.**
- **Certificate of paper to Manuscript entitled "Mobile Virtual Class" in Imperial Journal of Interdisciplinary Research (IJIR) in 2017 vol-3, issue-4.**
- **Certificate of best paper to Manuscript entitled "iDoc" in National Conference on Smart Computation and Technology (NCSCT) held at Poornima Institute of Engineering & Technology, Jaipur on April 8th-9th, 2016 published in International Journal of Computer Trends and Technology (IJCTT)V35(5).**
- **Certificate of paper Manuscript entitled "Brain Chip as the solution for the development of society" at National Conference on Recent Innovations in Engineering (NCRIE) held at Apex Group of Colleges, Jaipur & Kota during 26th-27th April, 2014 published in International Journal of Engineering, Management & Sciences (18).**
- **Certification for appreciation for being an organizer in "International Conference on Bioinformatics and System Biology - 2018 at IIITA on October 26th-28th,2018.**
- Selected two times for **State Level for Badminton** championship

- Selected for **campus selection of Foot Ball Organized** by Govt of Madhya Pradesh.
- GATE **2016/2017** qualified.

Personal skills:

Comprehensive problems solving abilities, good verbal and written communication skill, ability to deal with people diplomatically, willingness to learn, team facilitator and hard worker.

Personal Information:

Nationality	:	Indian.
Language Known	:	Hindi, English
Date of Birth	:	October-01-1991

I hereby declare that the above written particulars are true to the best of my knowledge and belief.

Place: Pune

Date: 19-02-2026
(Anupam Vishwakarma)
